FORTA®
FORTA-FERRO®

PROJECT PROFILE

COMPASS HOMES - WAIMAUKU, NEW ZEALAND

PROJECT DESCRIPTION

Compass Homes is leading the way in the construction of timber and concrete homes in New Zealand. New Zealand has been making concrete slabs for homes for decades however, previous versions have created leaky homes and have had poor heat retention. After attending a tradeshow, the slab director brought back the concept of a Concrete Insulated System (CIS), which combines insulating concrete slabs to improve energy efficency By using FORTA-FERRO® macro synthetic fibers, Compass Homes is creating durable, long lasting conrete slabs that will improve the longevity of these homes. **The owner and suppliers were pleased with the ease of installment that came with using FORTA-FERRO®.**

KEY POINTS

- Reduced Shrinkage Cracking
- Ease of Placement
- Superior Finish

DETAILS

Date: 2016
Location: Waumauki, New Zealand
Dosage: 3.0 kg. / cu. m.
Fiber: FORTA-FERRO® 2-¼"
