

CLO DE LA TECH WINERY - REDWOOD CITY, CA

PROJECT DESCRIPTION

FORTA-FERRO[®] structural fibers were used to replace other synthetic fibers in this tunnel lining project in Redwood City, California. The contractor switched to FORTA-FERRO[®] in the middle of this project for **ease of mixing and finishing**. Approximately 300 cubic yards of shotcrete with 7.5 pounds per cubic yard of FORTA-FERRO[®] were used inside the wine storage tunnel. The FORTA reinforcement provided **outstanding crack control, as well as reduced water permeability**.

KEY POINTS

- Reduced Cracking
- Reduced Water Permeability
- Easily Mixed and Finished

DETAILS

Date: May 2005

Location: Redwood City, CA

Dosage: 7.5 lbs. / cu. yd.

Fiber: FORTA-FERRO[®] 2-1/4"

Application: Shotcrete
