

CALDWELL CONCRETE SLAB - NEWNAN, GA

PROJECT DESCRIPTION

Caldwell Concrete needed a superior reinforcement method for a pavement slab that would need to withstand extremely heavy truck traffic on a daily basis. Project owners decided to reinforce the 6" slab-on-ground with 5 lbs. / cu. yd. of 2-1/4" FORTA-FERRO[®]. The owner also opted for a **joint-free slab design** in order to showcase FORTA-FERRO[®]'s post-crack benefits. Overall, project owners and specifiers appreciated the **easy mixing and placing ability** of the fiber and were happy with the finish of the final product.

KEY POINTS

- Reduced Cracking
- Impact Resistance

DETAILS

Date: December 2001

Location: Newnan, GA

Dosage: 5.0 lbs. / cu. yd.

Fiber: FORTA-FERRO[®] 2-1/4"
