

PUNCAK TEMPLER ROOF - MALAYSIA

PROJECT DESCRIPTION

The roof slab for the Puncak Templer in Selayang implemented a bubble deck system to radically improve the design and performance. At the project site, the roof slab was designed and reinforced using FORTA-FERRO[®]. It was also reinforced with a ball arrangement and shear reinforcement plates. The use of FORTA-FERRO[®] allowed for the slab weight to be much lighter than compared to other heavier reinforcement methods.

KEY POINTS

- Reduced Cracks
- Mixed and Pumped Easily
- Cost Effective
- Superior Finish

DETAILS

Date: December 2016

Location: Puncak Templer, Selayang, Malaysia

Dosage: 2.0 kg. / cu. m.

Fiber: FORTA-FERRO[®] 54 mm

Owner Type: Individual

Application: Roof Slab
