

## PEQUAE SCHOOL - KINZERS, PA

### PROJECT DESCRIPTION

The Pequae School was in much need of a remodel that included new concrete flooring for their gymnasium and also multiple classrooms. The project required a **smooth finishing surface** for their floors that was both **easy to work with and easy to finish**. The 4" concrete slabs for each application were reinforced with FORTA-FERRO<sup>®</sup> in order to **reduce cracking and increase overall durability**. The contractor, who had never worked with FORTA-FERRO<sup>®</sup> before, was **extremely pleased with the results**.

### KEY POINTS

- Superior Durability
- Reduced Cracking
- Excellent Mixing and Finishing Ability
