

## CORPORATE OFFICE - PLEASANT PRAIRIE, WI

### PROJECT DESCRIPTION

A corporate office expansion project in Pleasant Prairie, Wisconsin, turned to FORTA-FERRO<sup>®</sup> to reinforce slabs for its building addition. In total, **175,000 sq. ft. of the project's concrete for a slab-on-metal-deck and slab-on-composite-metal-deck was reinforced with FORTA-FERRO<sup>®</sup>.** The original Uline office used steel fiber in their building slabs. For this project, they **realized the positive reputation and performance benefits of FORTA-FERRO<sup>®</sup> outweigh steel fiber.**

### KEY POINTS

- Reduced Cracking
- Increased Safety
- Replaced Traditional Steel
- Easily Mixed and Placed
