

BLACKSTONE RIVER ROAD - WORCESTER, MA

PROJECT DESCRIPTION

FORTA-FERRO® macro synthetic fiber was chosen by the contractor, Senate Construction Corporation, in order to **replace traditional steel reinforcement** (#3 steel at 18' O.C) in both their concrete mezzanine and topping slab projects shown above. Due to the contractors previous experience with FORTA-FERRO®, it has become the obvious choice because of its **superior quality and finish, ease of use, and adaptability** for various applications ranging from the office space to heavy equipment areas.

KEY POINTS

- Used in Variety of Applications
- Ease of Use
- Superior Finish
