

MASS CRANE - TYNGSBOROUGH, MA

PROJECT DESCRIPTION

Mass Crane and Hoist in Tyngsborough, MA constructed a location for custom overhead crane manufacturing. The building includes a fabrication area, office space, and shipping dock. All slab-on-ground was fiber reinforced with 6.0 lb/cu yd of FORTA-FERRO and the composite deck was fiber reinforced with 4.0 lb/cu yd. The general contractor used FORTA-FERRO in previous projects and **appreciated the speed of installation, finishability, and reduced cost associated with using fiber over steel.** The general contractor partnered with the FORTA team knowing that **FORTA's engineers would provide accurate, 3rd party approved calculations and the field staff would be on site to make sure that the highest standards were upheld.**

KEY POINTS

- Reduced Cost
- Speed of Installation
- Excellent Finishability

DETAILS

Date: 2018

Location: Tyngsborough, MA

Dosage: 4.0 & 6.0 lb/cu yd

Fiber: FORTA-FERRO® 2-1/4"
