

CATERPILLAR - CADIZ, OH

PROJECT DESCRIPTION

FORTA-FERRO® synthetic macro fibers were chosen as the go to macro fiber because of their **ability to mix more uniformly** at these high dosages than other fibers on the market. The FORTA-FERRO® also **adds a level of toughness, durability, impact resistance and abrasion resistance to the concrete slab**. A broom finish was applied to the surface after concrete placement.

PROJECT UPDATE

Because the owners chose FORTA-FERRO to reinforce their concrete, after 5 years, this parking lot continues to look great with minimal cracking despite the high volume traffic.

KEY POINTS

- Mixed Uniformly
- Added Toughness and Durability
- Impact and Abrasion Resistant

DETAILS

Date: September 2014

Location: Cadiz, OH

Dosage: 8.0 lbs. / cu. yd.

Fiber: FORTA-FERRO® 2-1/4"

Owner Type: Individual
