

DISTRIBUTION CENTER PARKING LOT - SPRINGFIELD, OH

PROJECT DESCRIPTION

A large national grocery/retail chain chose FORTA-FERRO® to reinforce two slab-on-ground applications for their large distribution center parking lot. **The previous concrete parking lot was deteriorating and required replacement.** The main customer parking was replaced with a 10" pavement reinforced with 7.5 lbs. / cu. yd. of FORTA-FERRO®. The employee parking lot was replaced with a 6" thick slab reinforced with 5.0 lbs. / cu. yd of FORTA-FERRO®. Overall, the **newly poured and finished concrete parking lots benefited from FORTA-FERRO®'s ability to mix evenly, reduce cracking, and provide superior durability.**

KEY POINTS

- Superior Mixing
- Superior Finish
- Extreme Durability
- Reduced Cracking
