

## WAYNE TOWNSHIP LANDFILL - WAYNE TOWNSHIP, PA

### PROJECT DESCRIPTION

The Wayne Township Landfill poured a new high traffic pavement parking lot reinforced with FORTA-FERRO macro synthetic fibers. The fiber dosage of 5.0 lb/cu yd allowed contractors to replace the rebar in this project totaling 300 yds. This **sped up the total project time** and **lowered the end cost**. Using FORTA-FERRO **fibers will add long term durability and toughness** necessary for this pavement to withstand the weight of the garbage trucks over the years. Adding FORTA-FERRO fibers also gave the slab a **better wearing surface**.

### KEY POINTS

- Saved Time & Money
- Increased Durability
- Superior Finish

### DETAILS

**Date:** July 2019

**Location:** Wayne Township, PA

**Dosage:** 5.0 lb/cu yd

**Fiber:** FORTA-FERRO® 2-¼"
