

CITY STREET - OSHKOSH, WI

PROJECT DESCRIPTION

The City of Oshkosh, WI needed to replace Main Street due to the deterioration of the existing concrete street. Also, with a new sports arena in the plans adding more traffic to the street, the City of Oshkosh wanted to replace the existing street with a more **durable, longer life concrete pavement**. City Engineers chose to use concrete reinforced with 5.0 lb/ cu yd for FORTA-FERRO macro synthetic fibers to **aid in controlling cracking as well as make for a tougher more durable concrete pavement**.

KEY POINTS

- Reduced Cracking
- Mixed and Placed Easily
- Cost Effective
- Extreme Durability

DETAILS

Date: September 2017

Location: Oshkosh, WI

Dosage: 5.0 lbs. / cu. yd.

Fiber: FORTA-FERRO® 2-¼"

Owner Type: Government
